Innovative Ingredients

At Milne MicroDried, innovation comes in an expanding array of fruit and vegetable varieties – including select organics – and almost 20 different new products in development. This innovation and product diversity allows international and domestic food manufacturers to capitalize on emerging new consumer trends and meet the growing demands for healthier and organic food ingredients.

MicroDried's patented, proprietary dehydration technology uses low impact vacuum radiant energy to help preserve the flavor, colors and vital vitamins and minerals in each product. Every product is Non-GMO, gluten and allergen free and has a clean, single ingredient label with no added colors, sugars or preservatives.

In the end, MicroDried offers healthier ingredients that are rich in fiber and polyphenolic values yet low in fat, calories and sodium.

Versatile Applications

Today, Milne MicroDried fruits and vegetables are found in over 60 consumer products made by many of the largest, best known brands in the world. These ingredients are used in a variety of categories – including cereals, baked goods, dairy, bars/snacks, beverages, pet foods and teas.

MicroDried offers right-sized ingredients including coarse or fine ground powders; granules and fragments; and whole pieces, slices and wedges. To assure ease of use, ingredients can be customized for texture, water activity, moisture level and flowability for different applications.

These ingredients offer tantalizing flavors; rich, natural colors and interesting textures with strong piece identity that are simply healthier than many traditional options – all with no added colors, sugars or preservatives.

What's Trending Today?

Adding real fruit pieces and powder ingredients is now trending in craft brewing, new teas and dairy products, while more and more applications continue to emerge in traditional applications such as hot and cold cereals and pet foods.

As consumers demand healthier food products – Milne MicroDried® began producing fruit and vegetable ingredients with no added sugars, colors or preservatives that boast a clean, single-ingredient label. Since MicroDried's introduction in 2012, new trends have emerged in both the fruit and vegetable ingredient markets:

- **Demand for Healthier Products –**

MicroDried's ingredients are generally rich in fiber and polyphenols yet low in fat, calories and sodium, gluten and allergen free and non-GMO.

- **More Fruit Varieties**

with more interesting flavors and colors – MicroDried now offers 18 fruit varieties and almost 90 fruit ingredient products.

- **More Vegetables than**

Ever! Everyone is looking for new ways to add vegetables to our diets – MicroDried now offers eight vegetable varieties and 16 different vegetable products.

- **What's in Development?**

- Black Beans
- Sliced & Diced Beets
- Lima Beans
- Zucchini
- Snap Peas
- Crunchy Broccoli
- Crunchy Peach Wedge
- Crunchy Apple Wedge
- Citrus Slices – Lemon, Lime, Orange
- Kidney Beans
- Pinto Beans

**More
Flavors,

Single Source Processor & Food Safety

Milne MicroDried® is part of a vertically integrated, family-owned agri-business and is a single source processor for all of its fruit and vegetable ingredients. The company is committed to the highest domestic and international certification and food safety standards in the industry and has earned the highest possible rating from BRC for four years in a row.

All production facilities are AIB, BRC, Kosher and Organic certified annually and,

as a sole source processor, MicroDried products are fully traceable from the field through processing and shipping.
